有用酵素の探索と研究そして産業への活用

[キーワード: 酵素工学, 構造生物学] 講師 林 順司

FACULTY OF
BIOSCIENCE &
BIOINDUSTRY
TOKUSHIMA UNIVERSITY

Development of the enzymes having potential usefulness for industrial processes.

Senior Lecturer, Junji Hayashi, Ph. D

Research topics:

1. Development of the enzymes having usefulness for medical, clinical, food and environmental analysis.
2. Creation of artificial enzyme by protein engineering method.
3. Studies about metabolism mechanism of microorganism and development of the enzyme application for industrial processes.

Keywords : Enzyme technology
